

# BROMINE TABLETS

## Tabex<sup>®</sup>

### TECHNICAL DATA SHEET

#### What are Bromine Tabs?

Bromine is an alternative to chlorine sanitizers. Bromine cannot form “combined chlorine” or “chloramines”. Bromine does not have the strong odor or “burning eyes” effect of chloramines.

#### How do Bromine Tabs Work?

Bromine Tabs are a swimming pool/spa sanitizer. They disinfect and oxidize organic contamination. Once in water they produce Hypobromous Acid which disinfects the water and oxidizes organics.

#### Dosage Rates

Add bromine to a clean automatic feeding device, or floating feeder.

#### When do I use Bromine Tabs?

It is recommended for indoor pools and spas/hot tubs because they do not contain a stabilizer and cannot be used with cyanuric acid stabilizers. Check levels regularly and add Bromine Tabs when required.
